

Container handling volumes continue to grow

duisport Group records stable handling performance

Duisburg, 18. 01. 2017 - Container handling by the duisport Group reached a new record of 3.7 million TEU in the 2016 business year, compared to 3.6 million TEU in 2015. "During the first six months of 2016, we were still below the previous year's value. Therefore we were more than pleased to see the additional growth in the second half of the year on account of the positive developments, despite a difficult market environment," says duisport Chief Executive Officer Erich Staake.

Container handling, which makes up around 50 percent of the total handling volume, is the most important goods segment of the duisport Group. Total handling volumes for 2016 amounted to 66.8 million tonnes, which was slightly below the previous year's value (68.5 million tonnes). "This result was mainly due to a 1.2 million tonne special transaction in the rail segment in the 2015 business year," explains Staake. Ship handling volumes grew by an impressive four percent.

Staake expects total handling volumes to grow slightly during the 2017 business year. "New tenants in the port, new rail connections and continued positive growth in the China train segment will create positive impulses particularly with regard to container handling." At the same time, there are also a number of economic imponderables due to the trend towards re-nationalization and the threat of protectionism. Staake: "Our flows of goods are of course affected by global economic factors, which are outside of our control."

Duisburger Hafen AG is the holding and management company of the Port of Duisburg, the largest inland port in the world. The duisport Group offers full service packages in the areas of infrastructure and superstructure for the Port and logistics location, including relocation management. Furthermore, its subsidiaries provide logistic services, such as the development and optimization of transport and logistics chains, rail freight services, facilities management and packing logistics. www.duisport.com
